The user is obliged to ensure that our products are suitable for the process and use in question. In any case, our liability is limited to the value of goods delivered by us and used by you. We provide products of consistent quality, according to our general terms of sale and distribution.

CLEAN & CARE INSTRUCTIONS

Cleaning

Blattwerk II is a high-quality olive tanned aniline leather. Aniline leather is soft, warm and open pored full grain leather. Due to the open pores aniline leather is slightly sensitive. For everyday cleaning, it is sufficient to occasionally dust off the leather with a feather duster or a dry dust cloth.

Stains can be cleaned with a damp terry cloth, make sure that it's not too wet to avoid water marks. Dry the darkened area with a hair dryer to avoid water marks. Always practice a cleaning test in a hidden area, be especially careful with lighter leather.

For difficult stains, we recommend to contact a specialist before taking any actions. Damage can easily occur due to improper cleaning attempts.

Maintenance and Treatments

For maintenance, we recommend **Aniline Protector**. The Aniline Protector provides the necessary moisturizing to keep the leather soft and prevents fading.

In case of risk of stains caused by liquids, **Water Repellent Spray** is recommended.

Depending on the strain, heat, and light intensity, the leather should be sparingly maintained every three to twelve months.
