

Crazy Nubuk is a wonderfully fluffy nubuck leather with an impressive appearance. It is a perfect example of pairing traditions with the latest techniques: this leather is lightly through-dyed, then pre-dried, given a dark top-dye, dried again, then sanded vigorously leaving patches of grain here and there. This gives Crazy Nubuk its gorgeous, inimitable look, like tree bark and a real eye-catcher. Chairs, benches, sofas, they all look fantastically unique. Crazy Nubuk is made by specialists for specialists.

Application: unique furniture and leather goods

Thickness: 1.4 – 1.6 mm

Product type: Nubuck leather

Raw material: Central European bull hide

Available colors: 5 colors. Due to the complex finishing process it requires an accommodating attitude to variations in color.

Care products: Aniline Protector, Water Repellent Spray

Size: appr. 4.8 m² per whole hide

Minimum order quantity: 1 hide, appr. 5 m²

Tanning: Environmentally friendly mineral tanning

TECHNICAL CHARACTERISTICS

REMARKS/TEST METHOD/REQUIREMENTS	NOMINAL VALUE
Colour Fastness to Rubbing DIN EN ISO 11640 (grey scale level 1-5)	
50 tours, dry	≥ 3
20 tours, wet	≥ 3
20 tours, perspiration pH 8	≥ 3
Colour Fastness to Light DIN EN ISO 105-B02 (WBS-level)	≥ 3
Tear Strength (N/mm) DIN EN ISO 3377-1	≥ 20N
Fire Protection Standard DIN EN 1021 part 1+2	Passed

Quality test certificate in accordance to DGM guidelines 2016

We provide products of consistent quality, according to our general terms of sale and distribution.

CLEAN & CARE INSTRUCTIONS

Cleaning

Crazy Nubuk is a nubuck with a beautiful vintage look. Nubuck is sanded on the surface, therefore nubuck is warm and open pored. For everyday cleaning, it is sufficient to occasionally dust off the leather with a feather duster or a dry dust cloth.

In the case of fresh stains, first absorb with a dry terry cloth or paper towel by gently pressing with your fingers. Do not rub, this can change the surface irreversibly. Remaining spots can be cleaned with a damp terry cloth, make sure it's not too wet and do not rub too hard. Dry the darkened, wet area with a hair dryer with cold air to avoid water marks. Then sand remaining darkened areas with the **Sanding Pad**. This method can also be used when greasy areas, due to skin or hair contact, are darkened. Always practice a cleaning test in a hidden area first.

For difficult stains, we recommend to contact a specialist before taking any actions. Damage can easily occur due to improper cleaning attempts.

Maintenance and Treatments

For maintenance, we recommend **Aniline Protector**. This treatment provides the necessary moisturizers to keep the leather soft and prevents fading.

In case of risk of stains caused by liquids, we recommend **Water Repellent Spray**.

Depending on the strain, heat, and light exposure, the leather should be sparingly maintained every three to twelve months.
