

Neck Nubuk is a top class nubuck leather – nature at its purest! Soft and supple on the surface thanks to special buffing techniques. Manufactured with the best dyes and fat-liquoring agents to achieve the highest possible light fastness. Neck Nubuk is gently embossed and finally milled for a long period. This gives the leather its distinctively coarse grain pattern. Neck Nubuk is made exclusively from heavy first-class bull hides. Each of them proudly displays its natural features such as scarring, variance in texture or fat wrinkles, enhancing the character of this article: natural, honest, and imposing.

Application: Masterpieces for true leather enthusiasts: furniture, leather goods

Thickness: +3.0 mm

Product type: Nubuck leather

Raw material: Premium Central European bull hide

Tanning: Environmentally friendly mineral tanning

Care products: Aniline Protector, Water Repellent Spray

Size: appr. 5 m² per whole hide

Minimum order quantity: 1 hide, appr. 5 m²

Available colors: 15 colors

Custom colors: MOQ 150 m² per color

TECHNICAL CHARACTERISTICS

REMARKS/TEST METHOD/REQUIREMENTS	NOMINAL VALUE
Colour Fastness to Rubbing DIN EN ISO 11640 (grey scale level 1-5)	
50 tours, dry	≥ 3
20 tours, wet	≥ 3
20 tours, perspiration pH 8	≥ 3
Colour Fastness to Light DIN EN ISO 105-B02 (WBS-level)	≥ 3
Tear Strength (N/mm) DIN EN ISO 3377-1	≥ 20N
Fire Protection Standard DIN EN 1021 part 1+2	Passed

Quality test certificate in accordance to DGM guidelines 2016

We provide products of consistent quality, according to our general terms of sale and distribution.

CLEAN & CARE INSTRUCTIONS

Cleaning

Neck Nubuk is a nubuck leather. Nubuck leather is sanded on the surface, therefore nubuck is warm and open pored. For everyday cleaning, it is sufficient to occasionally dust off the leather with a feather duster or a dry dust cloth.

In the case of fresh stains, first absorb with a dry terry cloth or paper towel by gently pressing with your fingers. Do not rub, this can change the surface irreversibly. Remaining spots can be cleaned with a damp terry cloth, make sure it's not too wet and do not rub too hard. Dry the darkened, wet area with a hair dryer with cold air to avoid water marks. Then sand remaining darkened areas with the **Sanding Pad**. This method can also be used when greasy areas, due to skin or hair contact, are darkened. Always practice a cleaning test in a hidden area first.

For difficult stains, we recommend to contact a specialist before taking any actions. Damage can easily occur due to improper cleaning attempts.

Maintenance and Treatments

For maintenance, we recommend **Aniline Protector**. This treatment provides the necessary moisturizers to keep the leather soft and prevents fading.

In case of risk of stains caused by liquids, we recommend **Water Repellent Spray**.

Depending on the strain, heat, and light exposure, the leather should be sparingly maintained every three to twelve months.
