The technical information provided, either orally or in writing, is based on our current knowledge and is provided in good faith but without guarantees, this also applies where third party ownership is involved. The user is obliged to ensure that our products are suitable for the process and use in question. In any case, our liability is limited to the value of goods delivered by us and used by you. We provide products of consistent quality, according to our general terms of sale and distribution.

CLEAN & CARE INSTRUCTIONS

Cleaning

Romeo is a smooth slightly treated aniline leather. Thanks to the thin protective layer, this leather posture is warm and easy to care for. For everyday cleaning, it is sufficient to occasionally dust off the leather with a feather duster or a dry dust cloth.

Fresh stains should be removed immediately using a soft cloth or paper towel. Removing new stains immediately reduces the risk of permanent stains. Be careful not to rub too hard. Clean remaining dirt and stains with **Mild Leather Cleaner**.

Visible dirt and stains can be cleaned using **Mild Leather Cleaner**. Always practice a cleaning test in a hidden area first and be especially careful with lighter leather.

For difficult stains, we recommend to contact a specialist before taking any actions. Damage can easily occur due to improper cleaning attempts.

Maintenance and Treatments

For maintenance, we recommend **Leather Protector**. It's a protective cream with the necessary moisturizing oils and UV protection. It protects the leather from fading and keeps it soft. Depending on the strain, heat, and light intensity, the leather should be sparingly maintained every three to twelve months.

In high-traffic areas such as hotels, fast food restaurants, conference rooms, aircrafts or ships, the surface is more stressed and mechanical damages, color migration from jeans, and soiling on lighter leather occur more often. In such cases we recommend using **Leather Shield**, which provides a strong protection against wear, stains and color migration from jeans. **Leather Shield** should be applied after each cleaning or at least every two months to prolong the durability of the leather.

When both care products are used, the treatment with **Leather Shield** should always be applied before the treatment with **Leather Protector**. Let dry between the treatments.

Color damages caused by wear can be adjusted with **Leather Fresh**.
