We provide products of consistent quality, according to our general terms of sale and distribution.

CLEAN & CARE INSTRUCTIONS

Cleaning

Saddle is a soft, sanded aniline leather. Due to open pores aniline leather is slightly sensitive. For everyday cleaning it is sufficient to occasionally dust off the leather with a feather duster or a dry dust cloth.

Stains can be cleaned using a damp terry cloth. Make sure that the cloth is not too wet. Dry the darkened area with a hair dryer to avoid remaining water marks. Always practice a cleaning test in a hidden area. Be especially careful with lighter leather.

For difficult stains, we recommend to contact a specialist before taking any actions. Damage can easily occur due to improper cleaning attempts.

Maintenance and Treatments

For maintenance, we recommend **Aniline Protector**, it provides the necessary moisturizers to keep the leather soft and prevent it from fading.

If there's a risk for stains caused by liquids we recommend **Water Repellent Spray**.

Depending on the strain, heat and light exposure, the leather should be sparingly maintained every three to twelve months.
