

Scout is a lively vintage leather fit for a king: starting at a thickness of 3 mm, featuring an extremely expressive natural tumble pattern and a full, balanced hand. Scout has a lightly buffed surface, which is finished with a special wax formula and finally tumbled for that unique effect. As the finishing process is so challenging and variable, so is its product. Scout leather will vary in color from lot to lot and even from hide to hide, this makes it truly unique and gorgeous.

**Application:** Upholstery, Leather goods

**Thickness:** +3 mm

**Product type:** Pure aniline

**Raw material:** Premium Central European bull hide

**Tanning:** Environmentally friendly mineral tanning

**Care products:** Aniline Protector

**Size:** appr. 5 m<sup>2</sup> per whole hide

**Minimum order quantity:** 1 hide, appr. 5 m<sup>2</sup>

**Available colors:** 7 colors

## TECHNICAL CHARACTERISTICS

REMARKS/TEST METHOD/REQUIREMENTS	NOMINAL VALUE
<b>Colour Fastness to Rubbing</b> DIN EN ISO 11640 (grey scale level 1-5)	
50 tours, dry	≥ 3
20 tours, wet	≥ 3
20 tours, perspiration pH 8	≥ 3
<b>Colour Fastness to Light</b> DIN EN ISO 105-B02 (WBS-level)	≥ 3
<b>Tear Strength (N/mm)</b> DIN EN ISO 3377-1	≥ 20N
<b>Fire Protection Standard</b> DIN EN 1021 part 1+2	Passed

Quality test certificate in accordance to DGM guidelines 2016

The user is obliged to ensure that our products are suitable for the process and use in question. In any case, our liability is limited to the value of goods delivered by us and used by you. We provide products of consistent quality, according to our general terms of sale and distribution.

## CLEAN & CARE INSTRUCTIONS

### Cleaning

Scout is a strong, sanded leather. Due to the open pores aniline leather is slightly sensitive. For everyday cleaning, it is sufficient to occasionally dust off the leather with a feather duster or a dry dust cloth.

Fresh stains should be removed immediately using a soft cloth or paper towel. Removing new stains immediately reduces the risk of permanent stains.

Stains can be cleaned using a damp terry cloth. Make sure that the cloth is not too wet. Dry the darkened area with a hair dryer to avoid remaining water marks. Always practice a cleaning test in a hidden area. Be especially careful with lighter leather.

For difficult stains, we recommend to contact a specialist before taking any actions. Damage can easily occur due to improper cleaning attempts.

### Maintenance and Treatments

For maintenance, we recommend **Aniline Protector**, it provides the necessary moisturizers to keep the leather soft and prevent it from fading.

If there's a risk for stains caused by liquids we recommend **Water Repellent Spray**.

Depending on the strain, heat and light exposure, the leather should be sparingly maintained every three to twelve months.
