The technical information provided, either orally or in writing, is based on our current knowledge and is provided in good faith but without guarantees, this also applies where third party ownership is involved. The user is obliged to ensure that our products are suitable for the process and use in question. In any case, our liability is limited to the value of goods delivered by us and used by you. We provide products of consistent quality, according to our general terms of sale and distribution.

## CLEAN & CARE INSTRUCTIONS

### Cleaning

Valcona is a high-quality aniline leather. Aniline leather is soft, warm and open pored full grain leather. Due to open pores aniline leather is slightly sensitive. For everyday cleaning it is sufficient to occasionally dust off the leather with a feather duster or a dry dust cloth.

Stains can be cleaned using a damp terry cloth. Make sure that the cloth is not too wet. Dry the darkened area with a hair dryer to avoid remaining water marks. Always practice a cleaning test in a hidden area. Be especially careful with lighter leather.

For difficult stains, we recommend to contact a specialist before taking any actions. Damage can easily occur due to improper cleaning attempts.

### Maintenance and Treatments

For regular treatment of aniline leather we recommend **Aniline Cream**. It's a protective cream that prevents stains and dirt and keeps the leather soft and smooth.

Older leather and leather which is regularly exposed to sun or placed near a fireplace should additionally be treated with **Aniline Protector**. This treatment provides the necessary moisturizing for dry leather and prevents it from fading.

Depending on the strain, heat, and light intensity, the leather should be sparingly maintained every three to twelve months.
