

Walky Nubuk is a soft, velvety heavyweight nubuck leather with a casual, natural tumble pattern. It flows and rolls gently, with a natural, exquisite character. Walky Nubuk is made exclusively in Germany using only premium South German bull hides. It is made using high-grade pigments and fat liquors and is much more functional than other nubuck leathers due to its drum waterproofing process.

Application: Furniture, leather goods

Care products: Aniline Protector

Thickness: 1.4 – 1.6 mm

Size: appr. 5 m² per whole hide

Product type: Nubuck leather

Minimum order quantity: 0.5 hide, appr. 2.5 m²

Raw material: Premium South German bull hide

Available colors: 15 colors

Tanning: Environmentally friendly mineral tanning

Custom colors: MOQ 150 m² per color

TECHNICAL CHARACTERISTICS

REMARKS/TEST METHOD/REQUIREMENTS	NOMINAL VALUE
Colour Fastness to Rubbing DIN EN ISO 11640 (grey scale level 1-5) 50 tours, dry 20 tours, wet 20 tours, perspiration pH 8	≥ 3 ≥ 3 ≥ 3
Colour Fastness to Light DIN EN ISO 105-B02 (WBS-level)	≥ 3
Tear Strength (N/mm) DIN EN ISO 3377-1	≥ 20N
Fire Protection Standard DIN EN 1021 part 1+2	Passed

Quality test certificate in accordance to DGM guidelines 2016

We provide products of consistent quality, according to our general terms of sale and distribution.

CLEAN & CARE INSTRUCTIONS

Cleaning

Walky Nubuk is a nubuck leather, it is sanded on the surface. Therefore nubuck is warm and open pored. For everyday cleaning, it is sufficient to occasionally dust off the leather with a feather duster or a dry dust cloth.

In the case of fresh stains, first absorb with a dry terry cloth or paper towel by gently pressing with your fingers. Do not rub, this can change the surface irreversibly. Remaining spots can be cleaned with a damp terry cloth, make sure it's not too wet and do not rub too hard. Dry the darkened, wet area with a hair dryer with cold air to avoid water marks. Then sand remaining darkened areas with the **Sanding Pad**. This method can also be used when greasy areas, due to skin or hair contact, are darkened. Always practice a cleaning test in a hidden area first.

For difficult stains, we recommend to contact a specialist before taking any actions. Damage can easily occur due to improper cleaning attempts.

Maintenance and Treatments

For maintenance, we recommend **Aniline Protector**. This treatment provides the necessary moisturizers to keep the leather soft and prevents fading.

In case of risk of stains caused by liquids, we recommend **Water Repellent Spray**.

Depending on the strain, heat, and light exposure, the leather should be sparingly maintained every three to twelve months.
